Choice the richness and authenticity of the **WOOD GRAIN** *Series*

The **WOOD GRAIN** Series not only performs, but it exudes warmth and richness like all woods do.

Quality :

- The latest high: Definition technology has been used in creating a wood grain effect. This technology eliminates any potential for delamination because it is printed directly by laser on to the monolithic panel.
- An anti-UV fluorocarbon coating is applied to ensure longevity of both the product and its color.
- **HIGH SCRATCH RESISTANCE.**
- High density composite cement panel synonymous of durability and longevity.
- Product that is virtually maintenance free.
- In supporting this quality, the product comes with a 20 year Warranty – the best in the industry.

THE BEAUTY AND WARMTH OF WOOD...

COMBINED WITH LONG-LASTING COMPOSITE CEMENT !

WOOD GRAIN

Product :

- The different positioning of the product will accentuate the shade effect of the grain. The smaller the module, the greater effect it will have on the shading of the grain.

Design :

- Architects have determined that most Wood Grain products do not perform well when it comes to the visibility of the grain – at very short distance; you lose sight of the grain. Finex's Wood Grain product performs and stands out exceptionally well. Many Architectural firms have confirmed this through our research.
- Finex's offering consists of 6 timeless Wood Grain colors which will enhance the overall design and set your project apart.
- Panel modulation greatly enhances the contemporary architectural style.

Applications :

Architects are very interested in the Wood Grain effect for the following applications :

EXTERIOR :

- Hidden wall on the upper part of the building.
- Distinctive design element : visible from a distance – creates distinction in the overall design.
- Soffits : entry ways, mezzanines.
- Balconies : walls and ceilings.
- Facades : residential, commercial and institutional.

INTERIOR :

- Entrance hall : walls and ceilings.
- Indoor swimming pools : walls and ceilings.
- Subway and Bus Stations / Public Spaces and much more.

The **WOOD GRAIN** effect provides a timeless warmth to any design and enhances the aesthetic appeal.

WOOD GRAIN

Series

Installation :

The **WOOD GRAIN SERIES** is available with the following fastening systems :

- **PRESS-FIT** : Fastener surface mount with a reveal.
- **TRIM-FIT** : Pressure trims at the perimeter of the panel.

All visible accessories are similar color matched to the panel.

Budget :

- A 50% savings, compared to similar products, **FINEX** releases your creativity, making accessible all the richness and warmth of wood.
- **FINEX** stands out : panel and fastening system, **ALL INCLUSIVE** in one price.
- **FINEX** innovates with budget accessibility while optimizing quality.
